We offer a 100% satisfaction guarantee on our quality, dedication, and on-time delivery. Our great support will impress you even more than our great prices. Over 5 years, we have completed different kinds of projects; and we specialize in automation of business processes used by our clients.

CMM Technologies Pvt. Ltd.

SERVICES

Enterprise Solutions

ERP - Enterprise Resource Planning (basic version)

ERP is a time-tested tool for IT automation in finance, sales, purchase, inventory, planning, manufacture, maintenance, HR, Payroll and others. It delivers a single database that contains all data for the software modules.

Web Services

Web-designing

We offer a number of web designing solutions like:

1. Static website

These website are ideal for small & medium sized companies which do not require frequent or urgent changes on their website.

2. Dynamic website

These websites are ideal for companies offering products or services that may change with time. On dynamic website the information can be easily updated by the site administrator without any technical experience. These are also called database driven websites.

3. Web applications with flash

Every page of the website, every heading, link, graphic and text portion of the contents can be accessed and edited through password protected Back office area.

Web & E-mail Hosting

We host sites using both windows based and linux based systems.

PRODUCTS

Virtual Academic Master - (VAM)

A complete web based academic management solutions. Operations of an academic institution are divided into eight modules in the system to cover the entire academic & management needs.
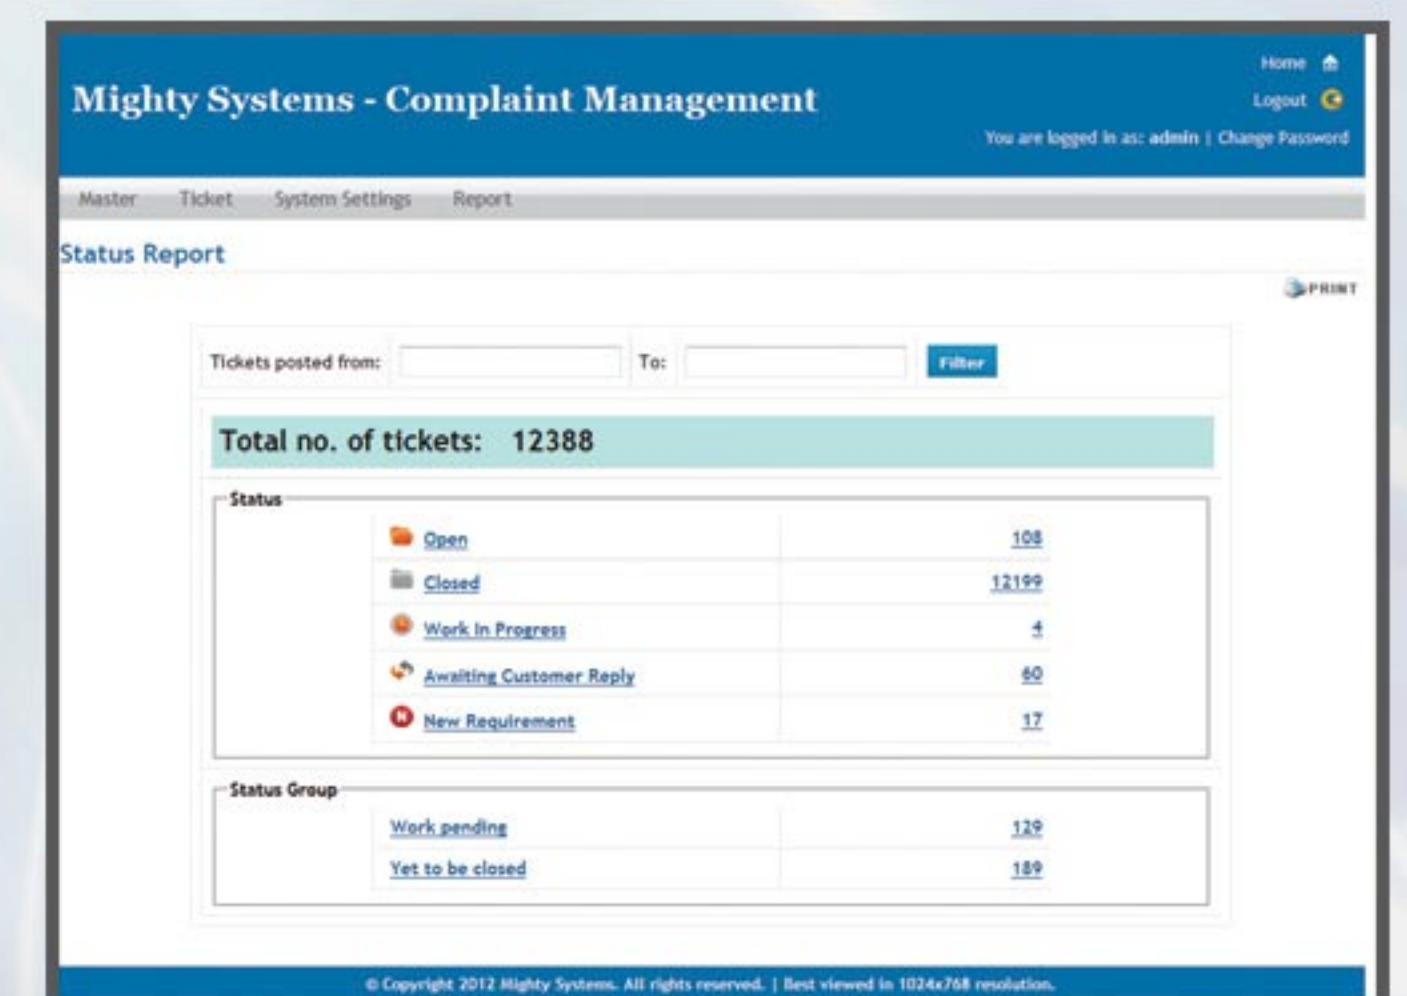

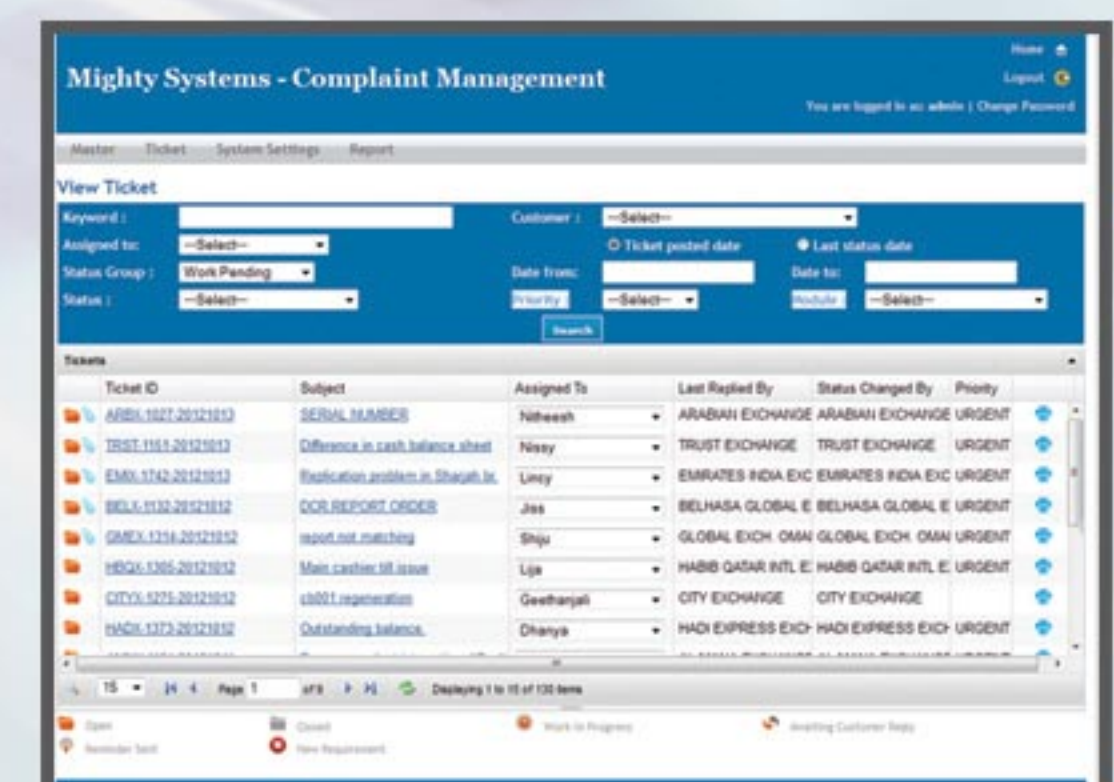

VAM is a system

- to improve student's & teacher's performance
- to focus on student's behavior & skills
- to quickly access information
- to achieve academic excellence
- to integrate academic & management system into one platform
- to monitor & control the entire campus through online at any time.
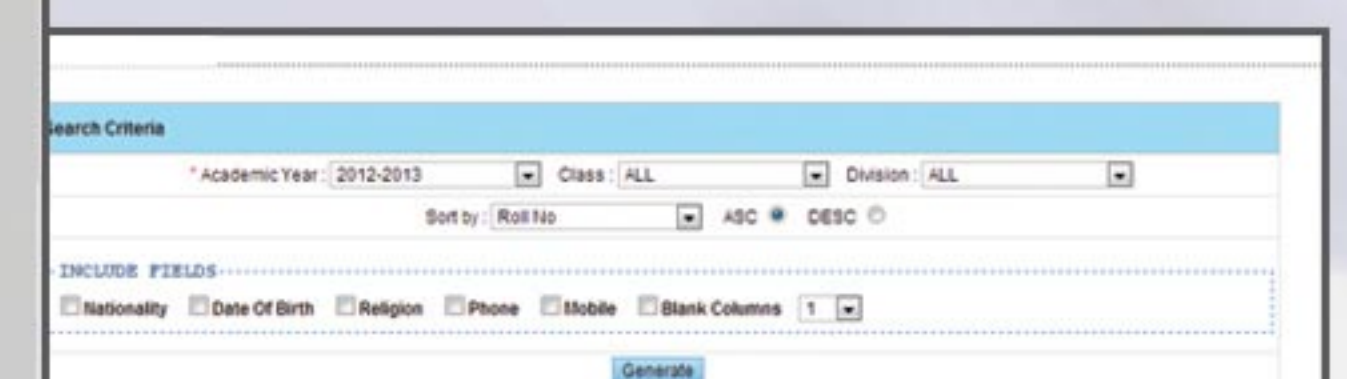

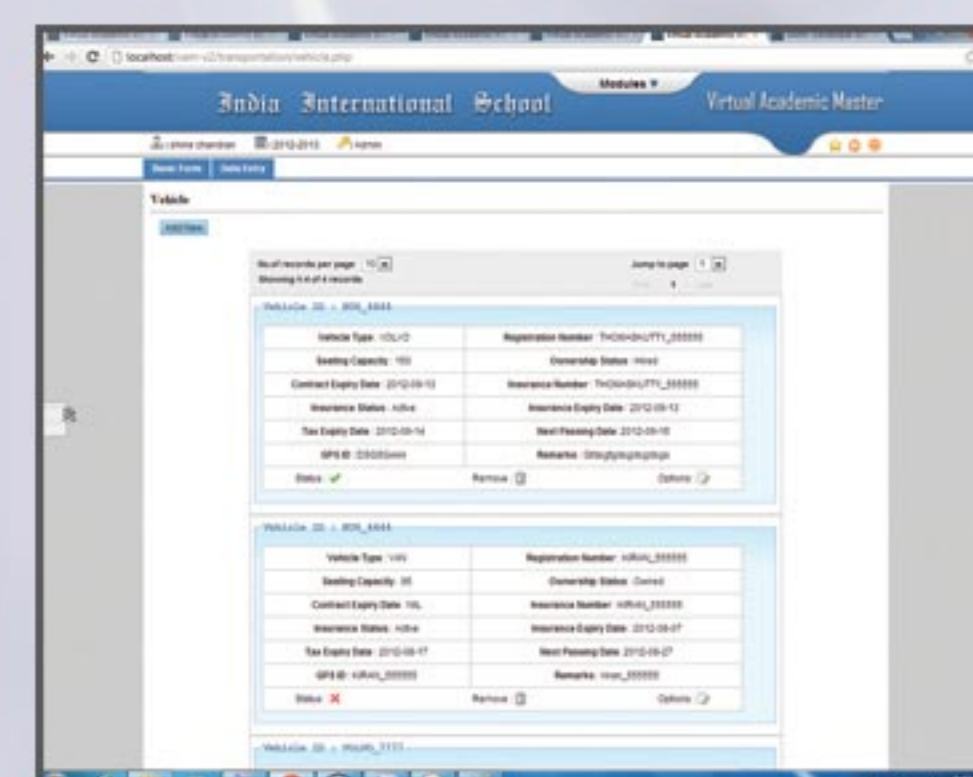

Ticket/Complaint Management System

Customer Complaints/Ticket Management Solution is designed to assist your organisation in the management of your complaint handling process.

CMM Technologies Complaint/Ticket Handling Software can be customised to meet most customer specifications. The complaints gets registered by the customer, escalates to the concern staff by the supervisor/administrator, or system will automatically assign it to a pre-defined user. This will result in reducing the number of complaints and help eliminate recurring issues. Our Customer Feedback Management will significantly reduce the cost of handling customer complaints for your organisation. User can view both open and closed complaints/ tickets by category, status, department, assignee and staff.
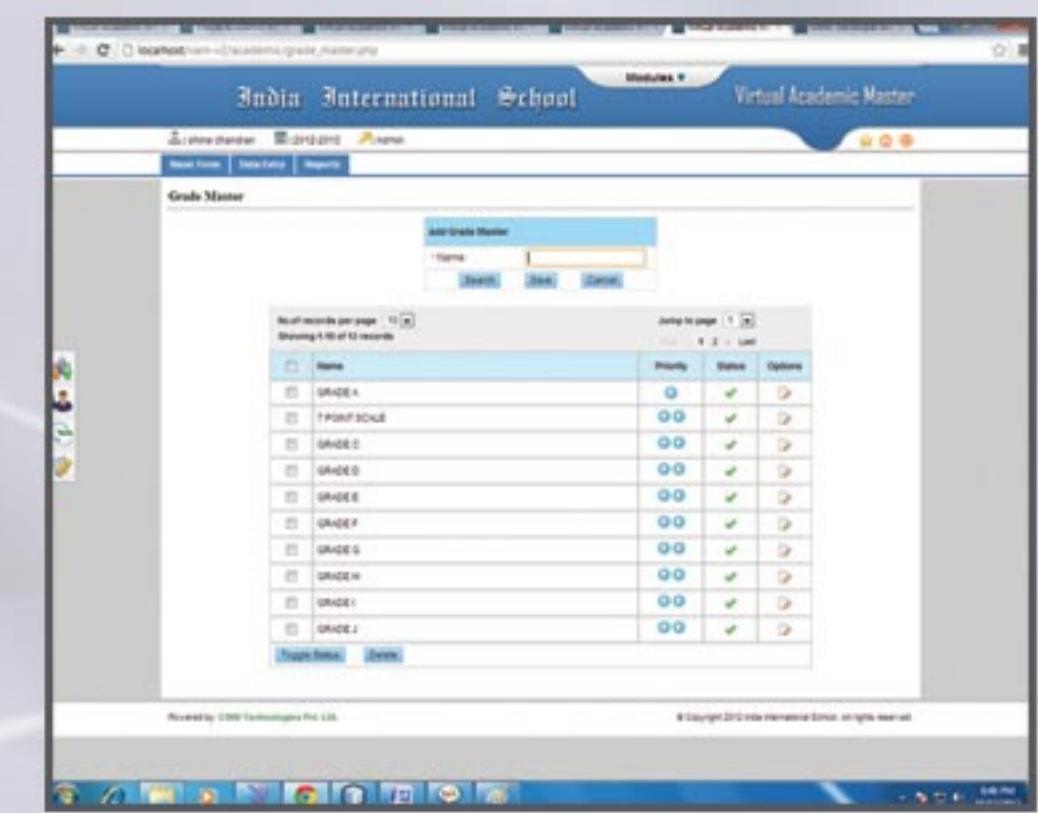

Transportation Management

Fleet allocation and maintenance of fleets in the institution/companies become a very simple task by using CMM Technologies Transportation Management System. User-friendly data entry forms, transferring/interchanging bus routes, creating new routes, etc are very simple in procedure. To the management, the system provides vital information & alerts regarding the expiration of insurance, renewal of permits, renewal of driver's residence, etc

@CMM Technologies Pvt. Ltd.

Library Management System

LMS - a full-featured program that provides an efficient and affordable solution to automate the institution/public library. The librarian can easily catalogue books and maintain records of issued, re-issued and overdue books. Online book reservation is a prominent feature of the system.
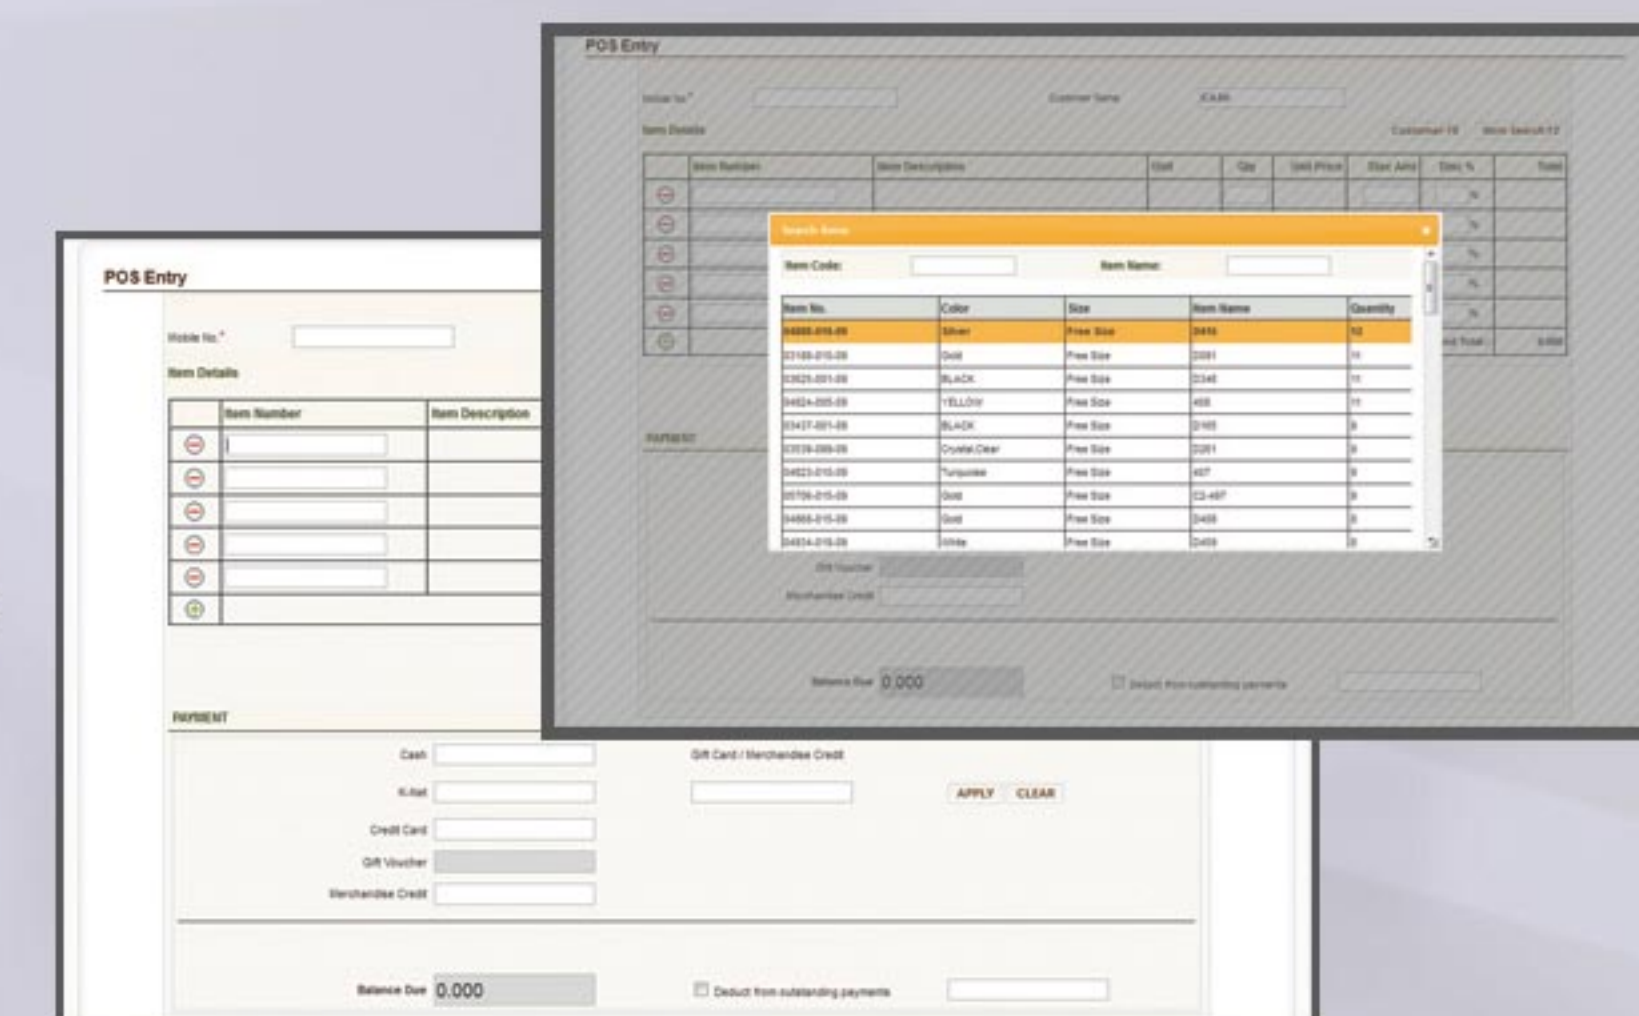

Inventory Management System

Inventory control management system takes care of Stock Maintenance, Transactions, Stock Transfer, and Billing for all stock related transactions. Searching facilities, depreciation calculations and of all dynamic reports concerned with inventory can be generated. System works with RFID & Barcode readers.

Online POS System

A shop deals primarily with the buying and selling products at their premises. Therefore it must use a retail POS system. CMM online Point-Of-Sale is simple and intuitive, yet powerful and scalable to handle multiple branches across locations and unlimited users. Works with credit-card swipes, barcode readers and receipt printers. This system will work both in online and offline platform.
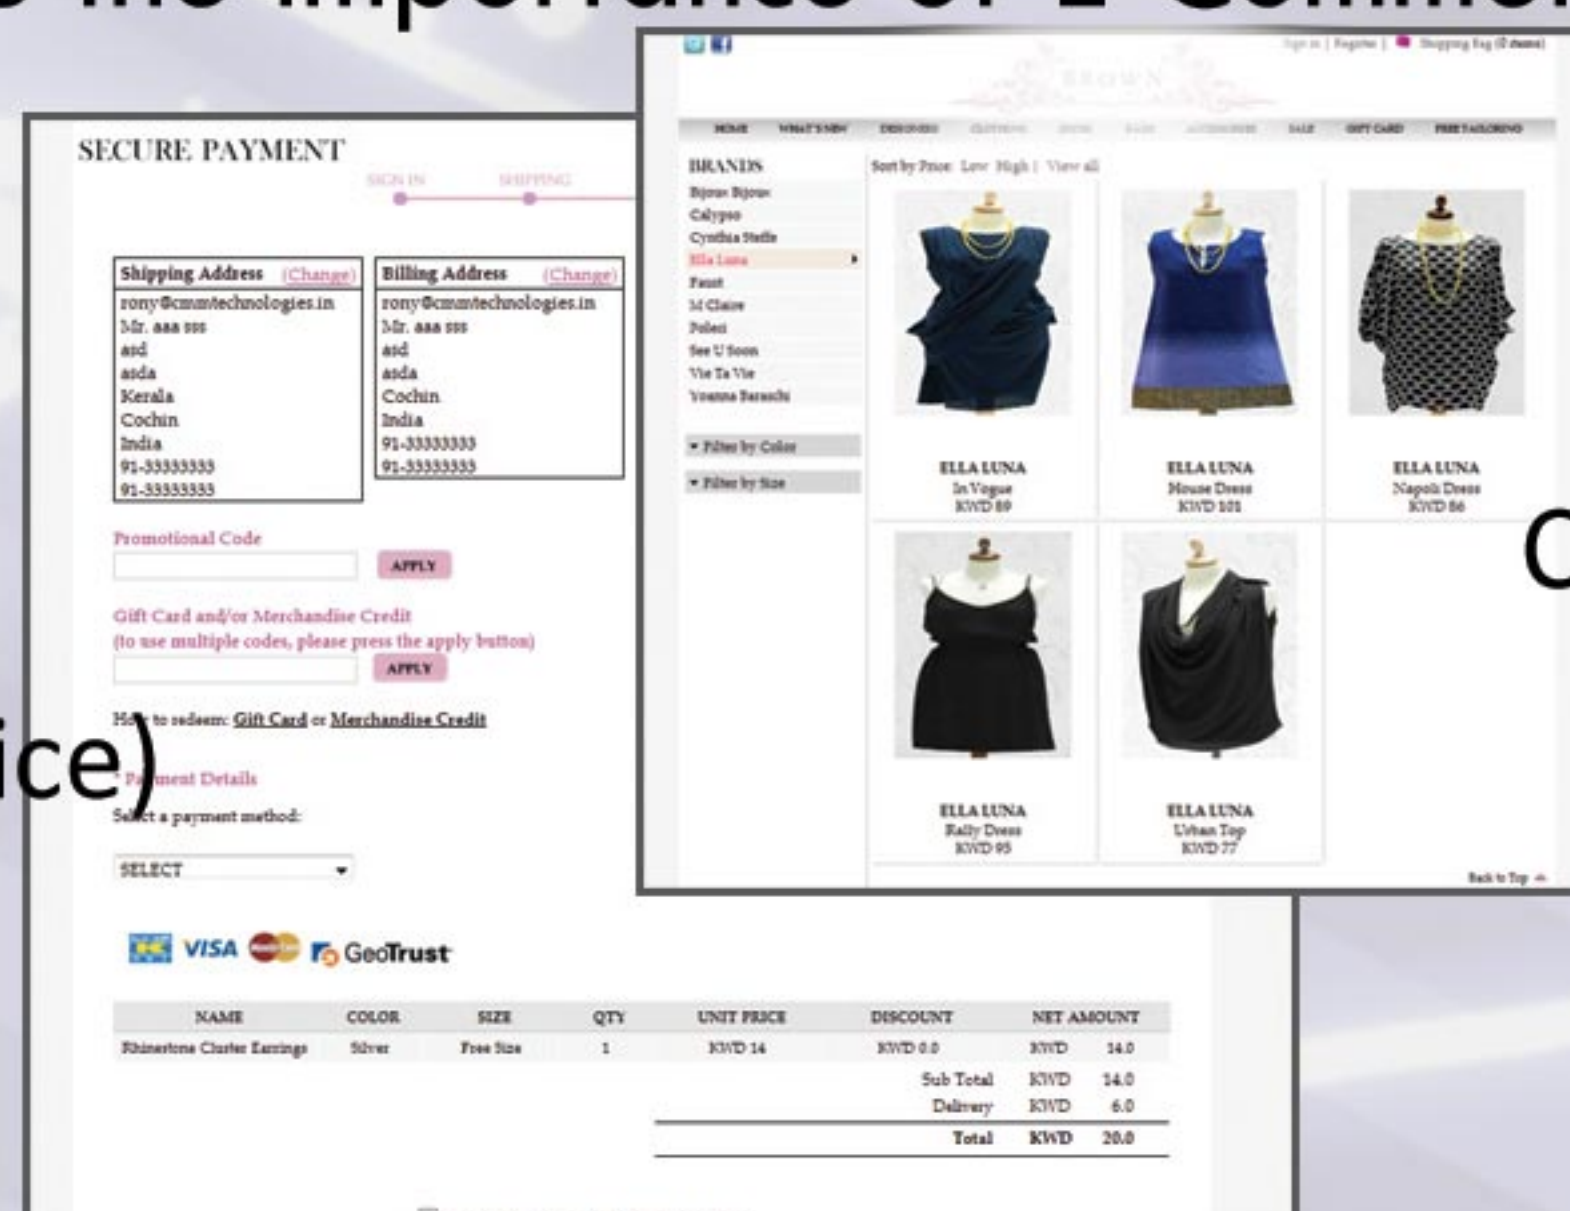

B2B & B2C E- Commerce Solutions

Online E-Commerce offers the amazing benefit of making buying and selling products and services of the internet and e-commerce portals act as a gateway for people across the globe to make these transactions. Buyers purchase and sell goods and services online rather than visiting the shops and making selections. This will increase the importance of E-Commerce portal.

Our E-commerce solutions feature:

- Business Based Graphic Theme
- Online Product Catalogue
- Browse/Search (Name/Category/Price)
- Special Offers & Hot Deals
- User Registration & Account Set Up

- Shopping Cart Integration
- Checkout & Payment gateway
- Order Tracking
- Inventories
- Online POS Integration
